## Introducing the *Megaflo System Compact GA Boiler*

## When it comes to heating, choose the best

When you invest in a new boiler, you need to know it will repay you with years of efficient heating and hot water comfort.

So ask your installer to fit you a Baxi boiler.

# Why choose Baxi?

# BAXI

Even if your existing boiler is still working well, replacing it could make perfect sense. A fully functioning, regularly serviced boiler that's 10 years old could cost you around £225\* more in annual heating bills than a new model.

The new Baxi Megaflo System Compact GA could save you an additional £71 a year as it continually monitors the gas and air mix it is burning to ensure it is running as efficiently as possible. Rated as over 91% efficient\*\* you will be making an economically and environmentally sound decision which is Energy Saving Trust recommended.

The Baxi Megaflo System Compact GA's space-saving design means that it can be fitted discreetly into a kitchen cupboard†, offering more options for where to locate it in your home.

A firm favourite with homeowners and installers alike, Baxi is one of Europe's largest and longest-established boiler manufacturers. We began producing boilers over 150 years ago – that's before the motor car or electric light – so we know a thing or two about quality heating. We're very proud of our long heritage of quality and innovation and that we continue to manufacture here in the UK.

Baxi boilers are designed to operate at maximum efficiency throughout their lifetime, giving you a lifetime of reliability and cost savings and the environment reduced carbon emissions.

## Why choose a system boiler?

A system boiler pumps hot water to the radiators and heats up the water in the storage cylinder.

Baxi boilers are not only economical to purchase and run, they cause less disruption during installation, as the boiler's pump and expansion tank are cleverly built in, saving installation time and valuable space in your home.

# Why choose the Baxi Megafluo System GA?

At the heart of the Baxi Megafluo System Compact GA is Baxi's pioneering THINK combustion management system which is designed to deliver you heat and hot water comfort whilst saving you money.

The THINK combustion management system continuously monitors the gas and air mix and adapts its output to suit your heat and hot water requirements more effectively. The result is lower gas consumption, reduced wear and tear on components and ultimately increased reliability of the boiler.

With a wide range of outputs the Baxi Megafluo System Compact GA is suitable for the most demanding of homes and with additional fuel savings of up to £71 over an alternative high efficiency boiler, buying a Baxi is one of the best decisions you'll ever make.

Megafluo System Compact GA Boiler

- Reduced fuel consumption, saving you an additional £71 a year on your fuel bills ✓
- Class leading hot water flow rates for increased comfort and convenience ✓
- Cupboard fit dimensions for discreet and flexible siting† ✓
- User friendly controls with clear, easy to read display ✓
- Service due reminder notifies you when the boiler requires a service ✓
- Compatible with low carbon technologies like solar thermal ✓
- Two year parts and labour warranty for added peace of mind ✓
- Recommended by the Energy Savings Trust ✓
- Support from our service division **heateam** ✓

# Accessories and controls

Additional heating and hot water controls can improve the overall performance of your heating system by as much as 13%\*, dramatically reducing the amount of fuel you use – and the amount you pay.

For more information please speak to your installer as they will be able to advise you on the controls that are right for you.
